

The Internet Pilot Planning Centre (IPPC) is an Internet based Norwegian aeronautical briefing system hosted by Avinor Air Navigation Services AS.

Information provided by the IPPC is retrieved from:

- Norwegian Aeronautical Information System
- Norwegian Meteorological Institute
- Eurocontrol EAD services

However, Avinor will not accept responsibility for corruption or changes to data which might take place in the Internet transport system.

Request for briefing via IPPC will contain information updated to the time of production of the report - thus enabling inclusion of the latest NOTAM, SNOWTAM and MET information.

If you experience any technical difficulties with IPPC, please e-mail: ippc@avinor.no

For operational issues contact AIS office, TEL (+47) 64819000 or email: ais@avinor.no
